In [2]:

```python
import requests
import json
import pandas as pd
import numpy as np
import matplotlib.pyplot as plt
ans=pd.read_csv("zomato.csv",encoding="latin-1")
data=ans.copy()
dictt={}
indian=data[data['Country Code']==1]
dictt={}

for i in range(indian.shape[0]):
    string=indian.iloc[i,9]
    li=[x.strip() for x in string.split(',')]
    for i in li:
        dictt[i]=dictt.get(i,0)+1
li=[]
for ele in dictt:
    x=ele
    y=dictt[ele]
    li.append([x,y])
li.sort(key=lambda x:x[1])
```

Analysis

I think having less number of cusines lowers your Rating to some extent as you don't have some varity.
